

## Proven FOUNDATION Fieldbus® Interface Option is Now Available on Brooks' Armored Variable Area Products

Brooks continues to expand its product offering with FOUNDATION Fieldbus communication options. Brooks launched the first thermal mass flow controllers with FOUNDATION Fieldbus in early 2008. Now Brooks brings the FOUNDATION Fieldbus option to its variable area meters, giving customers that require FOUNDATION Fieldbus options in just about every technology platform that Brooks offers.

The new variable area FOUNDATION Fieldbus option is available on the MT3809 and MT3750 products. Designed to integrally mount to these meters, the FOUNDATION Fieldbus option utilizes proven and world approved SMAR transmitter technology and is DeltaV™ compatible.
